WEATHER

WEATHER SYNOPSIS BY REGION:

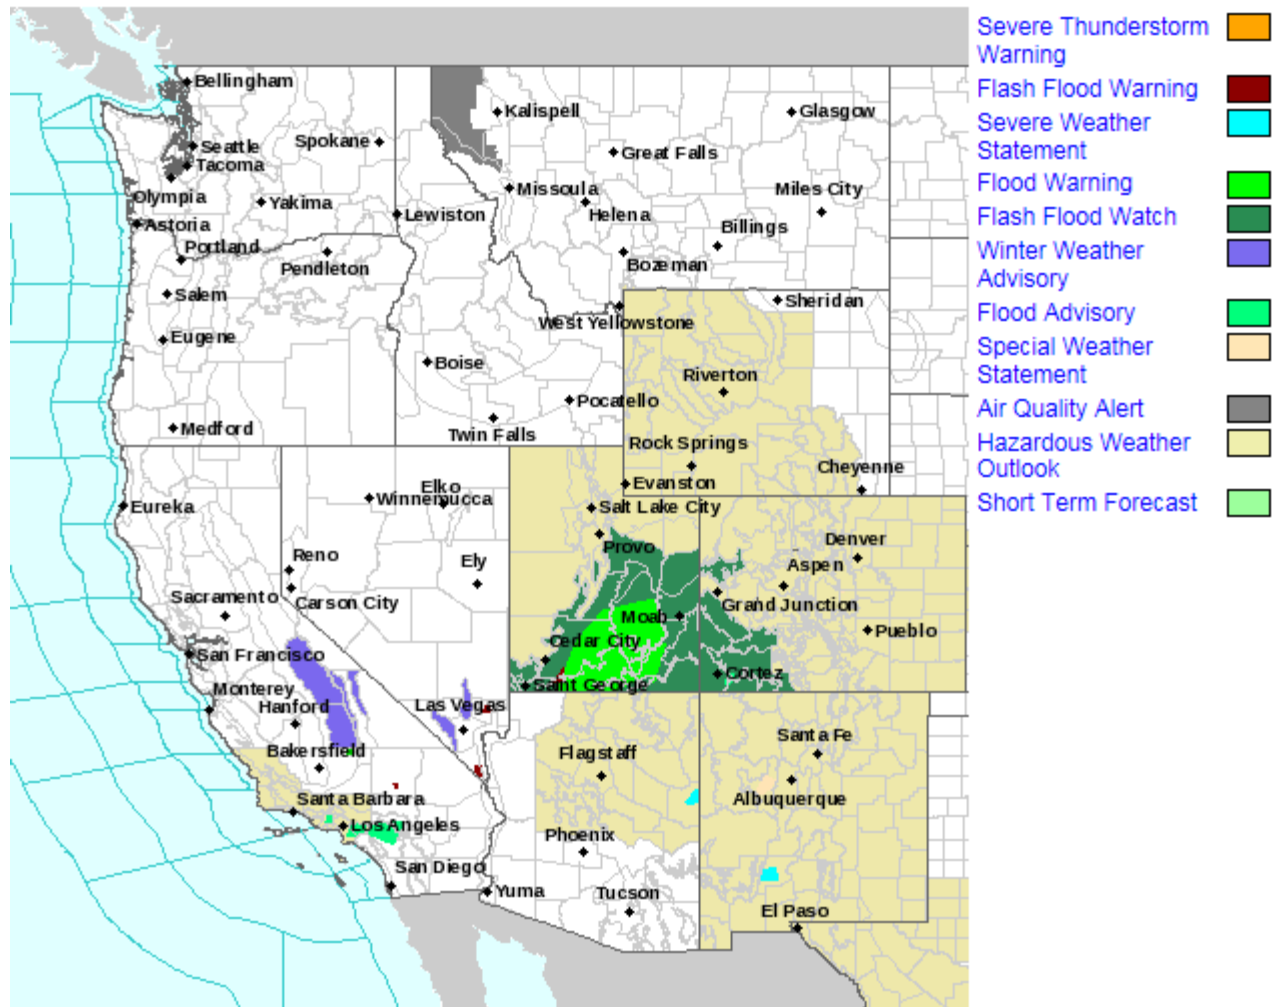

NORTHERN CALIFORNIA

A low pressure system has stalled over Southern California, but it will be drifting slowly east into the Desert Southwest over the next few days. Northern California will generally be under a ridge of high pressure that will strengthen as the low moves on, and this will keep things unseasonably warm most of the week and quite dry. Overnight relative humidity recoveries are expected to be quite good; however, thermal belt conditions seem likely to form in the mountainous areas which will create some local variations in daily relative humidity patterns. Afternoon temperatures will be climbing to above seasonal values this week with the warmest inland valleys into the lower 90s Friday and Saturday, the warmest of the next seven days. The high pressure will weaken some early next week, but it will still be quite warm and dry over Northern California. The marine layer is likely to return to the coast for a return of overnight and morning low clouds with patchy fog. In essence, mild, mostly dry fall weather will be over Northern California through the seven day period and likely through next week.

SOUTHERN CALIFORNIA

An area of low pressure currently over Southern California will bring scattered showers and thunderstorms to the Sierra, deserts, and from Los Angeles County south and east through this evening. Most locations will receive less than a quarter inch of additional rainfall, but the Southern Sierra to the Nevada border will see an additional 0.25 to 0.75 inch of rainfall. The low pressure area will move east to the Colorado River on Tuesday ending the shower and thunderstorm threat across most of the region, except scattered showers and isolated thunderstorms will continue across the deserts bordering Nevada and Arizona through Tuesday afternoon. Temperatures will warm a few degrees each day through Tuesday, with temperatures remaining well below normal for this time of year. A strong ridge of high pressure will build into California from the southwest bringing significant warming and drying to the region Wednesday through Saturday. Temperatures will warm to near normal Wednesday and then become well above normal by Thursday. Minimum humidity will drop to 20% to 40% Wednesday and then to 12% to 25% by Thursday. Light offshore flow will occur across the area Thursday through Saturday. The area of low pressure that is currently over Southern California will make it as far east as New Mexico and then it will swing back to the southwest, off the Baja Coast. This low will weaken the high over California Sunday through early next week for a cooling trend and an increase in humidity. This low may also bring scattered showers and thunderstorms to portions of the region starting in the far south Sunday and then spreading northward early next week.

STATE WEATHER MAP

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every Monday at 1100 hours.

CAL OES 2014 DROUGHT
